01 / CORPORATE PROFILE

AIO CODE

Digital Entity Technology for an AI-Driven World

ABOUT

AIO CODE (Artificial Intelligence Optimization Code) is an AI-focused technology venture developing DEOS: a Digital Entity Operating System connecting structured identity, creative assets, source-linked evidence, AI representation analysis and authorization governance.

MISSION

Develop technology for creators and organizations to structure, manage and document digital entities using traceable records, attributable information and reviewable permissions.

VISION

Establish DEOS as an interoperable platform for accountable digital entity management, with human oversight across identities, information, assets and authorized operations.

LEADERSHIP

Founder: Marii Cuadros. Co-Founder / Technical Development: Israel Cuadros. OZCU is the declared developing venture; legal formalization is pending.

02 / DEOS TECHNOLOGY

One system. Three capabilities.

AIO CODE develops DEOS as its core technology

ENTITY INTELLIGENCE

Canonical identities, official profiles, entity relationships, creative records, source references and documented claims. These are linked as structured entity records.

AI REPRESENTATION

Documented observations of how search and AI systems describe, retrieve and connect entities, with dates, sources and context. Outcomes in third-party AI systems are not guaranteed.

AGENT GOVERNANCE

Phase 2 development of creative-work records, scoped permissions, human approval, revision history and authorization controls. External agent enforcement remains a research and development objective.

TECHNOLOGY IN PRACTICE

Public Entity Passport records and Evidence & RAG search are available. Creator Trust & Rights has a fictional bilingual local demonstration of review, approval, controlled public projection and withdrawal after an edit. It is not a launched client service.

03 / APPLICATIONS AND DEVELOPMENT

Creator-first technology.

Applications, partnerships and the future of DEOS

TARGET INDUSTRIES

Artists and creators; music labels and creative agencies; brands and organizations; technology companies developing interoperable digital entity systems.

DEVELOPMENT DIRECTION

Evolve the administrator console into a DEOS application, with separately permissioned client spaces, structured creative assets, interoperable records and accountable agent-ready interfaces.

RESEARCH AGENDA

Explore delegated authorization, human oversight, revocation, auditable actions and cross-platform information exchange. These are development objectives, not current control over external AI agents.

PARTNERSHIPS

AIO CODE welcomes scoped pilots, technology collaboration, research partnerships and conversations with prospective commercial partners. Contact: instagram.com/aiocode_.

04 / LEGAL DOCUMENTATION / DOCUMENTACION JURIDICA

IP & Legal Documentation

Documentary organization, not legal representation

ENGLISH

DEOS is being developed to help creators and organizations organize authorship and ownership claims, provenance of creative works, contracts, consent records, permissions, dates, source references and supporting evidence in traceable dossiers. International development seeks to support jurisdiction-aware documentation prepared for independent professional review.

LEGAL LIMITS

AIO CODE is not a law firm, legal representative, official intellectual-property registry or certifying authority in any country. It does not give legal advice, determine ownership, register rights or guarantee cross-border compliance. Qualified professionals are responsible for jurisdiction-specific legal evaluation.

ESPANOL

DEOS se desarrolla para ayudar a creadores y organizaciones a organizar declaraciones de autoria y titularidad, procedencia de obras, contratos, consentimientos, permisos, fechas, fuentes y evidencias en expedientes trazables. Su proyeccion internacional busca facilitar la documentacion para revision profesional en cada jurisdiccion.

LIMITES

AIO CODE no es un despacho juridico, representante legal, registro oficial de propiedad intelectual ni entidad certificadora en ningun pais. No presta asesoria juridica, determina titularidad, registra derechos ni garantiza cumplimiento internacional. La revision juridica corresponde a especialistas habilitados.
